## **DynaPel and MacroSystem announce MotionPerfect® for Casablanca**

**Munich / Wetter, April 29, 2002. DynaPel Laboratories, subsidiary of DynaPel Systems Inc., New York, a leading developer of digital video solutions and MacroSystem, developer and manufacturer of the Casablanca video editing system with an installed base of 75,000 units, today announced a Casablanca version of DynaPel's software product MotionPerfect. The new software expansion enables the user to easily create high quality slow motion and fast motion video. MotionPerfect for Casablanca will be available from MacroSystem's international network of product dealers at an anticipated price of 100 € in the second quarter of 2002.**

With MotionPerfect MacroSystem offers a unique software Add-On for its Casablanca system. DynaPel's MotionPerfect, awarded "Innovation of the year 2000/2001" at CeBIT, allows the user to create professional slow motion and fast motion effects in video. By using advanced motion-compensated interpolation and morphing algorithms to generate the new "intra" frames, MotionPerfect produces a smooth and natural slow motion yielding much higher quality than today's techniques of repeating or blending frames.

"Our customers demand for easy to use, high quality functionalities allowing them to expand the power of their Casablanca products. DynaPel is the perfect partner delivering innovative and professional tools to our existing system," said Joerg Sprave, CEO of MacroSystem. "We look forward to providing the new DynaPel solution to our customers."

"The strategic partnership with MacroSystem promises to achieve much more than this one product," added Dieter Kondek, President & CEO of DynaPel Systems. "Our experiences and expertises are quite complementary. Teaming up allows both companies to profit from the growing demand for high-quality video solutions."

Kondek continued: "The Casablanca system is a success because it gives video enthusiasts the same creative tools as a modern movie studio. Cooperating with MacroSystem enables us to expand beyond the PC platform and bring our unrivaled video effects to Casablanca users. MotionPerfect is the first release of a planned series of at least three products in 2002."

**About MacroSystem**

The history of MacroSystem began 12 years ago, at that time as a developer of software and computer peripherals. Soon, it became apparent that digital video technology would be the core of the company's developments. With the Casablanca products, MacroSystem belongs to the most innovative and successful manufacturers of stand-alone digital video editing systems. These systems have been created with the ambitioned, semi-professional and professional videographer in mind and are as such not only subject to an extremely high product quality, Casablanca is also renowned for its easy-to-learn and user-friendly interface.

Worldwide success of the stand-alone systems (manufactured in Germany) has been made possible with the efforts made by daughter companies located in the USA and Switzerland and other distributors in 23 different countries. The heart of the company is situated in westpahlian Wetter (Germany) and has made a name for itself as a pioneer in the world of digital video technology. The competence in MPEG2 technology or in the creation of DVDs has underlined this reputation. In future and with the help of its dynamic employee team, the goal is to establish the MacroSystem brand name as a synonym for innovative and breaking technology.
