DynaPel Announces SteadyHand Plug-In for Adobe Premiere

New York / Munich, July 9, 2002. DynaPel Systems, Inc., a leading developer of digital video solutions, today announced that its popular video editing tool SteadyHand is now available as a Plug-In for Adobe Premiere 6.0.

The new SteadyHand Plug-In allows DynaPel's breakthrough technology to be utilized within the Adobe Premiere environment. SteadyHand is an image stabilization tool, which processes and corrects footage containing camera actions such as zooming, rotating and panning to produce a smooth and professional-looking video. SteadyHand's robust interface features a variety of user definable settings such as correction modes and degrees of processing enabling optimal results to be achieved for any video.

Free trial copies of the SteadyHand Plug-In can be downloaded from the consumer section of the DynaPel websites, www.dynapel.de and www.dynapel.com, in English or German. The functionality is not restricted in the SteadyHand Plug-In trial version, however a watermark (logo) will be inserted into the processed video.

In Europe the Plug-In is available at a recommended retail price of € 79,95 (incl. VAT) via electronic download from Softwarehouse.de and Softwarehouse.ch. The software can also be purchased at www.dynapel.com.

The SteadyHand Plug-In 1.0 for Adobe Premiere 6.0 supports Windows 9X, Windows Millennium, Windows 2000 and Windows XP (Home or Professional). Additionally, Windows XP compatibility has been added to the most recent versions of DynaPel's other video editing tools, MotionPerfect 4.2, DynaPel SteadyHand 2.1 and the new tool DynaPel SlowMotion 1.0. Free upgrades may be downloaded from the DynaPel websites www.dynapel.de and www.dynapel.com.
